

UNIVERSITY ACADEMIC REGULATIONS

Academic Year 2026–2027 | Student Regulations and Examination Handbook

Document Purpose

This document provides sample university regulations for academic, attendance, examination, assessment, and student conduct matters. It is designed as a reference document for students and as sample source material for a University Regulation RAG Assistant.

Important Note: This is a fictional sample university regulation document created for an academic project. It is not an official regulation of any real university.

1. Academic Structure

The undergraduate academic programme follows a semester-based structure. Each academic year normally contains two semesters. Students must register for the courses prescribed for their programme and semester.

1.1 Course Registration

Students shall complete course registration within the dates announced by the Academic Office. A student who does not complete registration within the prescribed period may be required to obtain special approval before attending the registered courses.

1.2 Credits

Each course carries a specified number of credits. The credits awarded for a course are earned only after the student satisfies the academic requirements and passes the applicable assessment.

2. Attendance Regulations

Attendance is recorded for every scheduled academic session. Students are expected to attend lectures, laboratory sessions, tutorials, and other compulsory academic activities.

2.1 Minimum Attendance

A student must maintain a minimum of **75% attendance** in each course to be eligible to appear for the end-semester examination, unless an approved academic exemption applies.

2.2 Attendance Shortage

Students whose attendance falls below the required minimum may be prevented from appearing for the end-semester examination in the affected course. The student must contact the department or Academic Office regarding the applicable procedure.

2.3 Attendance Calculation

Attendance percentage is calculated using the number of academic sessions attended divided by the number of academic sessions conducted, multiplied by 100.

2.4 Medical or Approved Leave

Leave may be considered only when supported by appropriate documentation and approved by the competent authority. Approval of leave does not automatically guarantee eligibility for an examination.

3. Internal Assessment

Internal assessment may include quizzes, assignments, laboratory work, presentations, class tests, projects, and other assessments specified by the course instructor.

3.1 Assignment Submission

Assignments must be submitted within the deadline announced by the instructor. Late submissions may be subject to the course-specific late-submission policy.

3.2 Internal Marks

Internal assessment marks shall be recorded according to the approved course evaluation scheme. Students may be permitted to review their recorded marks during the period announced by the department.

4. End-Semester Examinations

End-semester examinations are conducted according to the examination timetable published by the Examination Cell. Students must follow the instructions printed on the examination notice and hall ticket.

4.1 Examination Eligibility

A student must satisfy the applicable attendance and academic requirements before being permitted to appear for an end-semester examination.

4.2 Examination Hall

Students must carry their valid university identity card and examination hall ticket when required. Students should report to the examination venue at least 15 minutes before the scheduled start time.

4.3 Examination Materials

Only materials specifically permitted by the Examination Cell may be brought into the examination hall. Electronic devices, including mobile phones and smart watches, are not permitted unless explicitly authorized.

4.4 Late Entry

Students arriving after the scheduled start of an examination may be subject to the late-entry rules announced by the Examination Cell. Entry may be restricted after the permitted late-entry period.

5. Examination Conduct

Students must maintain academic integrity during examinations. Communication with other students, unauthorized materials, impersonation, and unauthorized electronic assistance are prohibited.

5.1 Academic Misconduct

Cases of suspected examination misconduct may be reported to the Examination Cell for review. The consequences shall be determined according to the applicable disciplinary procedure.

6. Grading and Results

Course results are determined according to the approved evaluation scheme. A student must satisfy the minimum academic requirements specified for the course to receive a passing grade.

6.1 Grade Review

Students who believe that a recorded mark contains an error may submit a review request within the period announced by the Examination Cell. Requests submitted after the stated deadline may not be considered.

6.2 Supplementary Examination

Where applicable, students who are eligible for a supplementary examination may register within the announced registration period and appear according to the published supplementary examination schedule.

7. Promotion to the Next Semester

Students may progress to the next academic semester subject to the academic progression rules of the programme. Students with outstanding course requirements should consult the department for applicable rules.

8. Student Conduct

Students are expected to maintain respectful behaviour on campus and during academic activities. Disruptive behaviour, harassment, damage to university property, and violation of institutional rules may result in disciplinary action under the applicable procedure.

9. Library and Learning Resources

Students may use university library and digital learning resources subject to the rules established by the Library and Information Services unit.

9.1 Borrowing

Library materials must be returned by the due date shown in the library system. Overdue materials may result in borrowing restrictions until the applicable issue is resolved.

10. Academic Grievances

Students who have an academic grievance should first approach the relevant course instructor, mentor, department, or designated academic authority according to the nature of the issue.

10.1 Submission of Grievance

A grievance should clearly describe the issue and include relevant supporting information. The authority receiving the grievance may request additional documents when necessary.

11. Frequently Referenced Rules

Topic	Regulation
Minimum attendance	75% in each course, unless an approved exemption applies.
Exam reporting	Students should report at least 15 minutes before the scheduled start.
Mobile phones	Not permitted in the examination hall unless explicitly authorized.
Assignment submission	Must follow the deadline announced by the instructor.
Grade review	Request must be submitted within the period announced by the Examination Cell.

12. Contact and Authority

Questions regarding academic regulations should be directed to the relevant department or Academic Office. Questions regarding examinations, hall tickets, examination schedules, or examination conduct should be directed to the Examination Cell.
